As part of my PhD dissertation, I am trying to coordinate a team of researchers who are going to be sampling wetlands all across the state. We require landowner permission to access private properties in these areas and compiling a list of landowners for hundreds of plots is a daunting task. Jan and Molly have been instrumental in our research. They have helped me find plat books to use for determining landowner information. They have both been happy to help and Jan has been kind enough to allow me to check out a few plat books at a time to scan so we can add our own information to the maps. This has been so much more useful than photocopies for our purposes. Thanks!
